

OUR IRONER WAXES

HIGH-POWER-WAX-PLUS

This premium wax was developed for flexible chest ironers, but can also be used for ironers with conventional steel chests and for high temperatures up to 250 ° C. High-Power-Wax-Plus consists of highly effective raw best-quality-materials. It allows long trough dwell times without burning or crusting, and has an antistatic and cleaning effect.

Dartritt : small flakes

Pack sizes:

Carton á 20 kg: Art. 083112

Bucket á 8,5 kg: Art. 083220

Can á 800 g: Art. 083225

EURO-HT-WAX-FLAKES

The recipe of this premium wax contains highly effective raw materials such as carnauba prime-yellow and bee wax of the highest quality, supplemented by antistatic additives and allows extremely long trough dwell times without burning or crusting. EURO-HT-FLAKES is designed for high-performance multi-roller ironer up to 210 ° C chests-tem-perature. The large flakes ensure slow melting, so that the rear units of multi-rollers get enough wax in the chests.

Dartritt: large flakes

Pack sizes:

Bag á 25 kg: Art. 082060

Bucket á 7,5 kg: Art. 082055

EURO-HT-WAX-PRILLS

The best carnauba and beeswax are the main ingredients of this premium ironer-wax. With the lowest dosage, it allows extremely long trough dwell times at temperatures of up to 210 ° C without burning or crusting and also has an antistatic effect. The small pearls are used for quick melting. EURO-HT-PRILLS can therefore be used univer-sally, on single-roller table linen or multi-roller high-per-formance ironers.

Dartritt: small pearls

Pack sizes:

Bag á 25 kg: Art. 082052

Bucket á 10 kg: Art. 082051

Can á 900 g: Art. 082050

IRONER WAX TYPE C 2

This wax consists of selected plant-based natural products, which are melted and filtered several times during manufacture, thereby achieving a particularly high degree of purity. The small flakes allow optimal distribution and adhesion in the waxing cloth and melt quickly and evenly. The ironer-wax type C 2 is suitable for table linen ironer and machines up to the middle performance segment and trough temperatures up to a maximum of 185 ° C

Dartritt: small flakes

Pack sizes:

Bag á 25 kg: Art. 084041

Bucket á 8,5 kg: Art. 084055

Can á 800 g: Art. 084045

KARA-WAX

Vegetable, powdery ironing wax with antistatic additive for the lower performance segment and temperatures up to a maximum of 175 ° C

Dartritt: very small flakes (powdery)

Pack sizes:

Bucket á 10 kg: Art. 084022

Can á 900 g: Art. 084009
